TEQIP-III sponsored

One Week Online Short Term Course On

Data Analytics Tools and Techniques

(22-26 September 2020)

Objectives of the Course

This STC is aim to engage applicants from the academia, scientific and research communities with a number of aspects of Data Analytics, concepts and technologies, Machine Learning and Deep Learning, and current trends of data analytics in various applications. The five-day workshop enables the participants to learn and conceptualize Data Analytics, understand theoretical and practical aspects of quantitative and qualitative data analysis, and apply various quantitative modelling and data analysis techniques to solve real world business problems.

The aim of this short-term course is to provide an exposure in “Data Analytics Tools and Techniques” through interaction with experts in different domains of research.

Session Timings

Session I : 11:00 AM –1: 00 PM

Session II: 02.00PM –04:00 PM
