

One-week TEQIP-III sponsored Short Term Course on " **Exploring Potential: STC on 2020 research advances towards generating leading investigator** " was organized by Department of Computer Science and Engineering at Dr. B R Ambedkar National Institute of Technology Jalandhar from 24-28 August 2020. An intensive One-week Short term course has been being designed for faculty and students of engineering and technological institutions. It was also open to persons from industry and doctoral/MTech/BTech students. The basic motive of this course was to aware research scholars about recent ongoing trends in latest research domains and accelerate the pace of quality in research. The technical program has included state-of-the-art lectures, discussion/presentation sessions, specifically focused on Insights, Research challenges in the different domains of computers. The course aims at providing theoretical knowledge and implementation details on advanced computing areas.
