← Certificate Import Wizard

### Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.

# STEP 7:

The image shows a Windows Certificate Import Wizard window overlaid on a File Explorer window. The File Explorer window is titled "Open" and shows the "Downloads" folder. The Certificate Import Wizard window is titled "Certificate Import Wizard" and has a "File to Import" section with a "File name:" field and a "Browse..." button. A red arrow points from the "Browse..." button to the "All Files (\*.\*)" option in the File Explorer's file type dropdown menu. Two red boxes with arrows provide instructions: "Step 1 : Click on Browse" and "Step 2 : Click and select All Files (\*.\*)".

**Step 1 : Click on Browse**

**Step 2 : Click and select All Files (\*.\*)**

**File Explorer (Open) - Downloads**

- File name:
- File type: X.509 Certificate (\*.cer;\*.crt)
- File type list:
  - X.509 Certificate (\*.cer;\*.crt)
  - Personal Information Exchange (\*.pfx;\*.p12)
  - Certificate Trust List (\*.stl)
  - Certificate Revocation List (\*.crl)
  - Microsoft Serialized Certificate Store (\*.sst)
  - PKCS #7 Certificates (\*.spc;\*.p7b)
  - All Files (\*.\*)

**Certificate Import Wizard**

**File to Import**

Specify the file you want to import.

File name:  **Browse...**

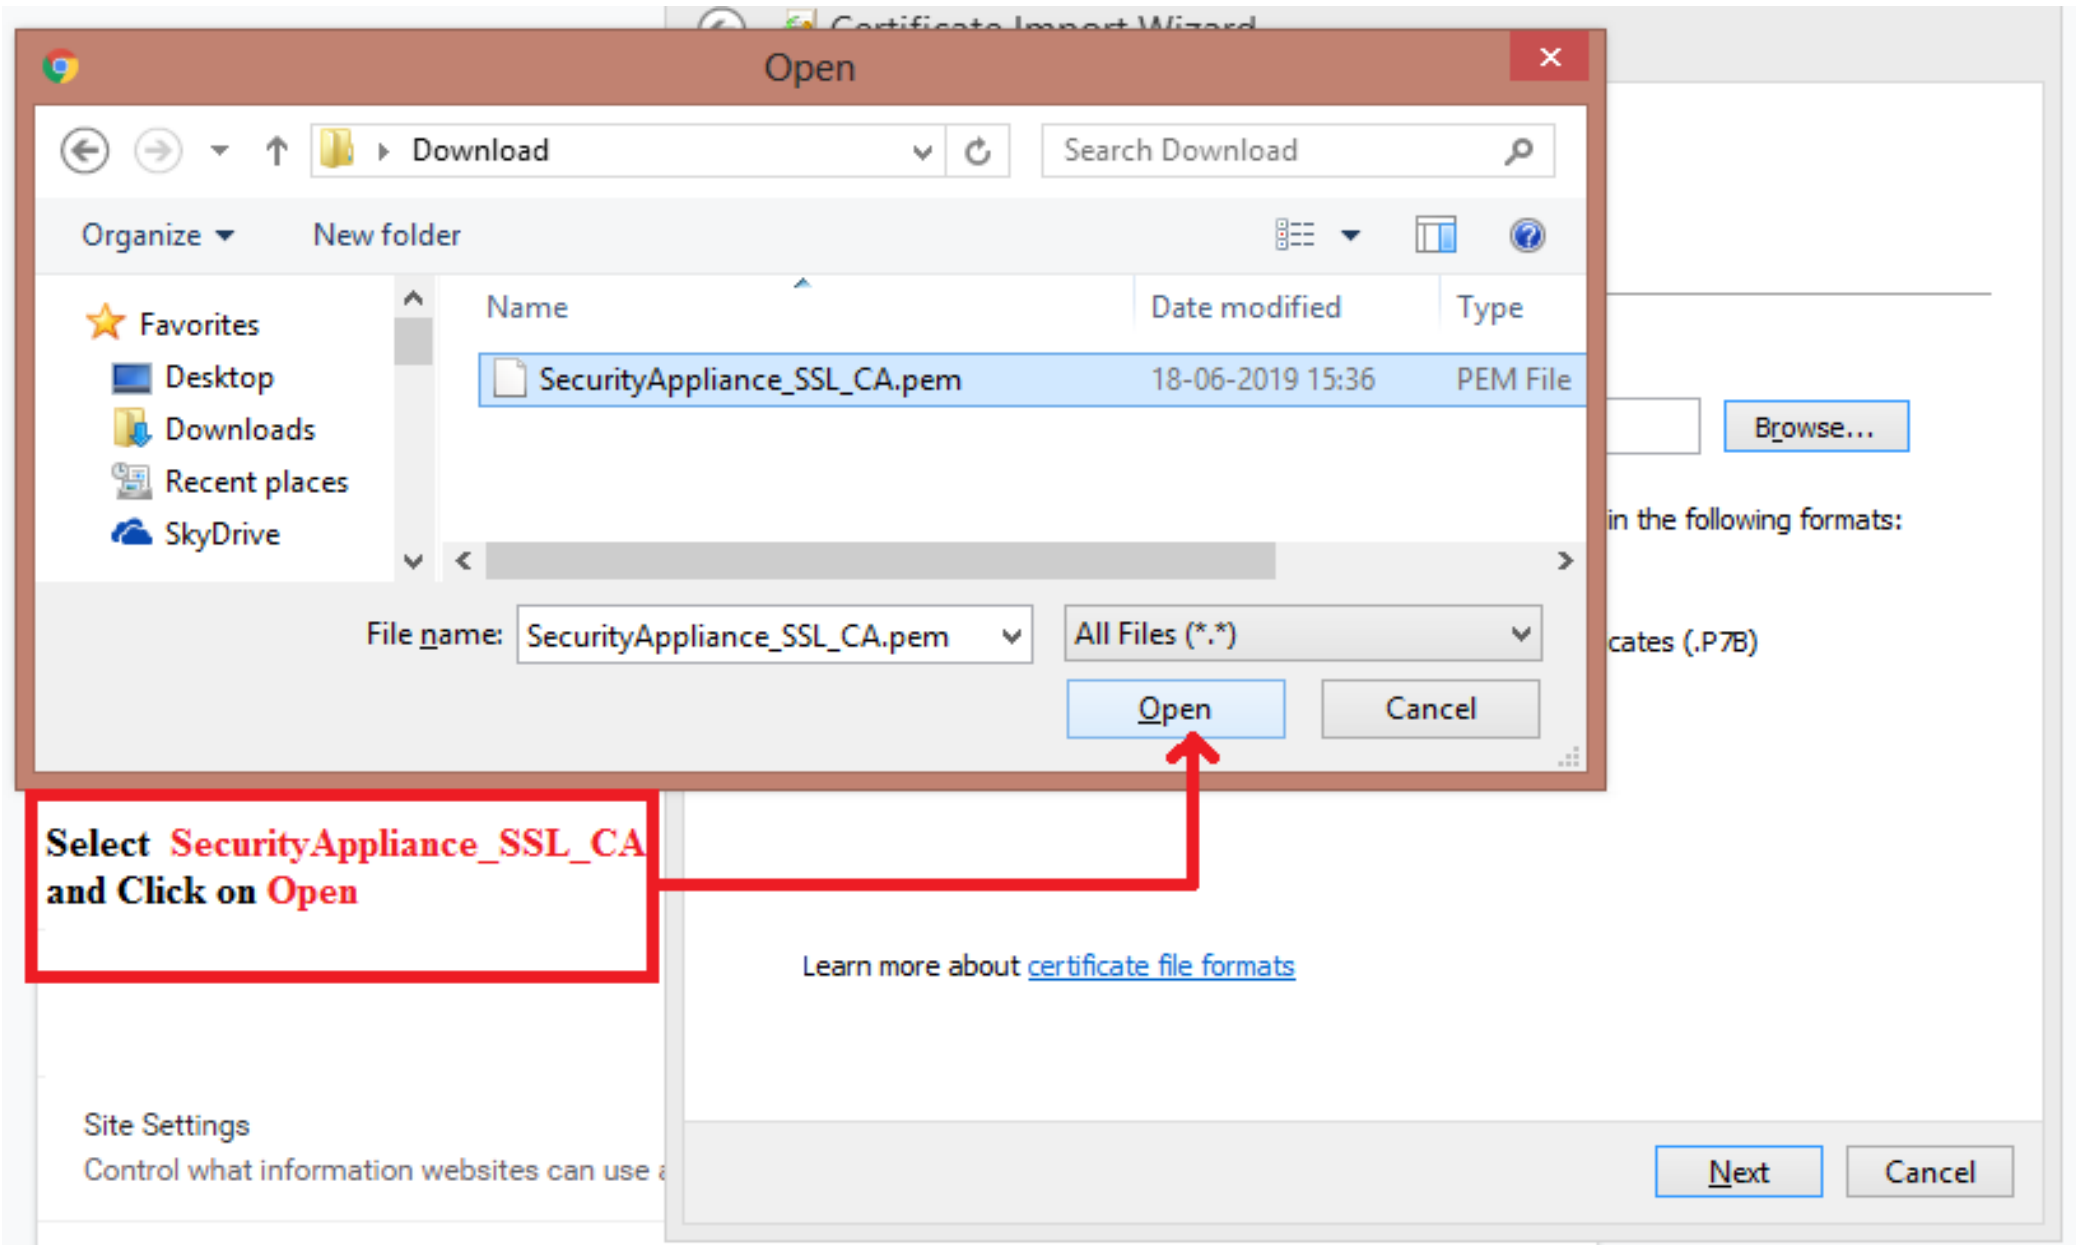

Note: More than one certificate can be stored in a single file in the following formats:

- Personal Information Exchange- PKCS #12 (.PFX, .P12)
- Cryptographic Message Syntax Standard- PKCS #7 Certificates (.P7B)
- Microsoft Serialized Certificate Store (.SST)

**Next** **Cancel**

**STEP 8:**

## STEP 9:

The image shows a browser's 'SSL' settings page in the background. The 'Certificate Import Wizard' dialog box is the primary focus, currently on the 'File to Import' step. The file path entered is 'C:\Users\kanwar\Desktop\Download\SecurityAppliance\_SSL\_CA.pe'. A red box highlights the 'Next' button at the bottom right of the wizard, with the text 'Click on Next' and a red arrow pointing to it.

**File to Import**  
Specify the file you want to import.

File name:  
C:\Users\kanwar\Desktop\Download\SecurityAppliance\_SSL\_CA.pe

Note: More than one certificate can be stored in a single file in the following formats:

- Personal Information Exchange- PKCS #12 (.PFX, .P12)
- Cryptographic Message Syntax Standard- PKCS #7 Certificates (.P7B)
- Microsoft Serialized Certificate Store (.SST)

### Certificate Import Wizard

**Certificate Store**  
Certificate stores are system areas where certificates are kept.

Windows can automatically select a certificate store, or you can specify a location for the certificate.

Automatically select the certificate store based on the type of certificate

Place all certificates in the following store

Certificate store:  
Trusted Root Certification Authorities

**Click on Next**

Learn more about [certificate stores](#)

## STEP11:

The image shows a browser window with the 'SSL' settings page open. A 'Certificate Import Wizard' dialog box is displayed in the foreground. The wizard is titled 'Completing the Certificate Import Wizard' and contains the following text:

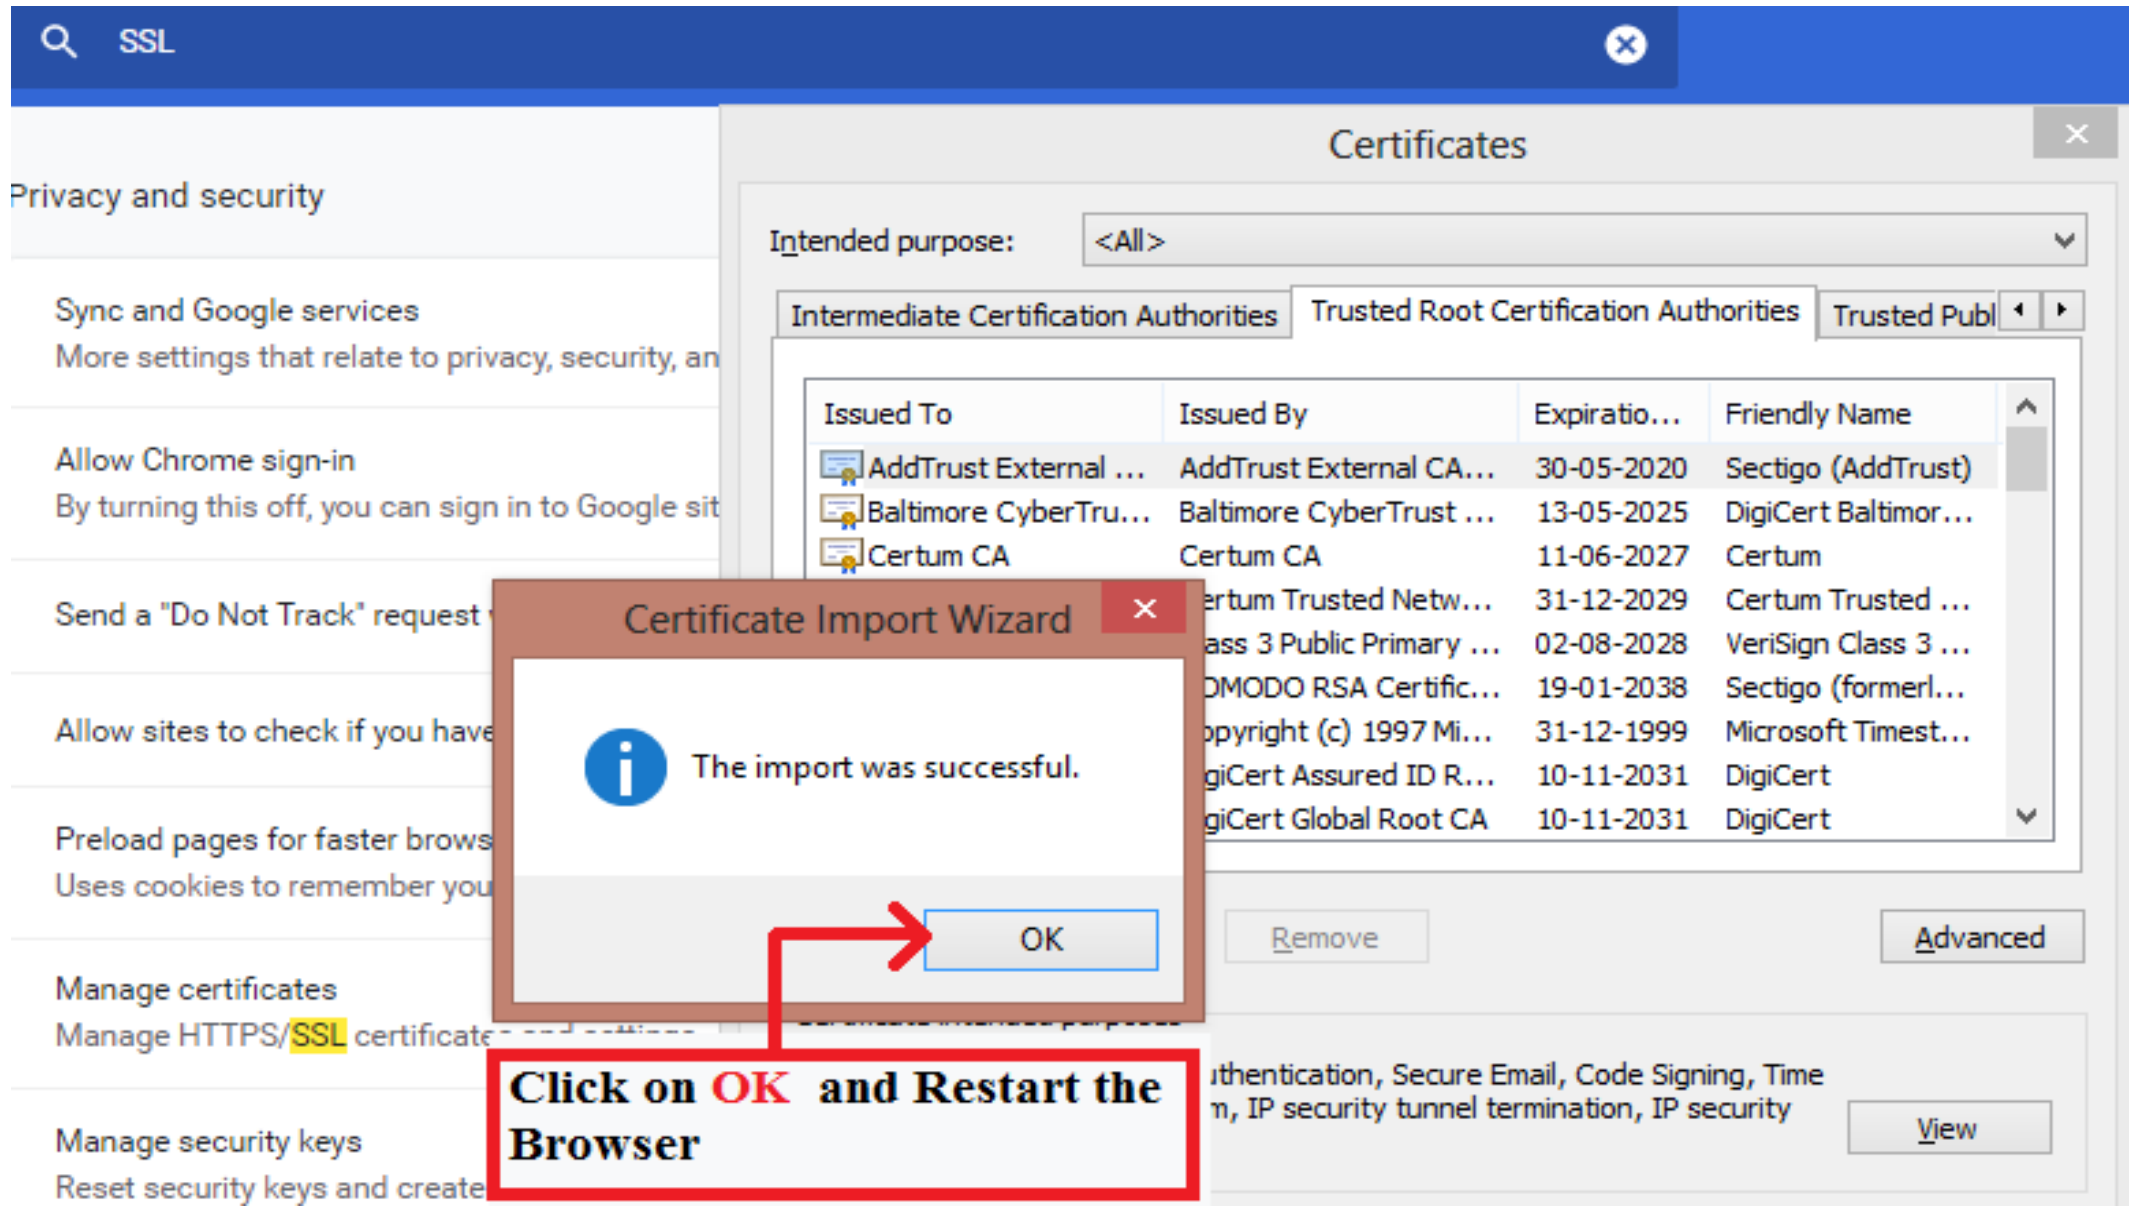

The certificate will be imported after you click Finish.

You have specified the following settings:

Certificate Store Selected by User	Trusted Root Certification Authorities
Content	Certificate
File Name	C:\Users\kanwar\Desktop\Download\SecurityApplian

At the bottom of the wizard, there are two buttons: 'Finish' and 'Cancel'. A red box highlights the 'Finish' button with the text 'Click on Finish' and a red arrow pointing to it.

## STEP 12:

The screenshot shows the Windows Certificate Import Wizard dialog box overlaid on the Windows Settings application. The wizard displays a message: "The import was successful." with an information icon. A red arrow points from the "OK" button in the wizard to a red-bordered box containing the instruction: "Click on OK and Restart the Browser".

**Click on OK and Restart the Browser**

**Certificate Import Wizard**

The import was successful.

OK

**Certificates**
